ONE-OF-A-KIND DOORS FOR ONE-OF-A-KIND PROJECTS

This is not a catalog: no standard models, no kit of parts, no configuration limitations. Each door & window built by Hammer & Hand draws from our firm's 25-year tradition of fine woodworking to craft an entirely unique creation matched to both the project's performance and aesthetic goals.

Although based in Portland, Oregon—the epicenter of exceptionally skilled flannel-wearing craftspeople—we build doors and windows for designers and homeowners throughout North America. Our creations have enhanced projects from coastal Maine to rural British Columbia.

OFFICE TI DOORS AND WINDOWS
ALASKAN YELLOW CEDAR
Portland, Oregon

ARTISAN DOORS

If you have an idea for a door beyond anything you can find off the shelf, we'd love to talk about what you're imagining. We have built one-of-a-kind, bespoke doors with a myriad of creative goals including a metal barn door inspired by the client's vintage WWII motorcycle collection, a blue keyhole-shaped French pocket door, and a barndoor with an inlaid chalkboard to provide a sanctioned place for the client's toddler to draw all over the walls.

Whatever you're dreaming up, we can build it. We relish the challenge inherent in building something unique and entirely prototypical.

ELEVATE PERFORMANCE AND AESTHETICS WITH OUR SUPER-INSULATED DOORS.

Super-insulated with a tight seal akin to a safe, our PHIUS-certified doors not only meet the most stringent thermal performance requirements, they support the aesthetics of any project: beautiful and expertly crafted whether designed in sleek modern lines or built to replicate historic Craftsman details.

While we have two specific configurations that are formally PHIUS Certified, we can scale any door or window meet a project's targeted performance goals.
